

MURIETA EQUESTRIAN CENTER BIOSECURITY PROTOCOLS

- Keep your horse(s) home, do not bring to MEC, if they have shown any signs of fever or illness in the 72-hours prior.
- MEC sanitizes all stalls between shows. We strongly recommend all you also sanitize the stalls prior to bedding your horses.
- Avoid animal-to-animal contact.
- Check and record temperatures twice daily with a unique thermometer per horse.
- Report any suspicion of illness in horses to Show Management and your vet, including a temperature over 101.5 F, or over 101.0 F if on a NSAID.
- Do not share any equipment between horses. Each horse needs its own brushes, thermometer, and alcohol spray bottle.

PLEASE DO NOT SHARE TACK!

- When filling water buckets, DO NOT dip the end of the hose in each bucket. Hold the hose above the water when filling.
- Wash/sanitize hands thoroughly before and after direct horse contact.
- Limit human-horse contact.
- Because humans can be an indirect means of disease transmission, avoid moving between barns unless necessary.
- Limit use of communal areas such as cross-ties and wash racks and do not use adjacent ties or racks when another horse is present.
- Do not graze horses on lawn areas.
